The image shows a geological outcrop with a scale bar and a label. The scale bar is a vertical wooden rod with alternating yellow and black segments, positioned in the upper center of the frame. The outcrop consists of several layers of rock. The top layer is a light-colored, blocky limestone. Below it is a layer of reddish-brown, crumbly material. The bottom layer is a dark grey, layered rock. A small, rectangular, dark blue label with white text is placed in the lower left corner of the outcrop. The label contains the following text: "Les Etangs 23/8/91", "H3", and "Fin Remplissage".
